## About Us:

EPATS is a dynamic company characterized by its integrity to customers that have made it legendary as a great value of excellence in providing quality solutions. It has structured a professional operation staff in which empowerment and sense of responsibility are the keys to organizational development.

EPATS fundamental objective of business is to provide high quality solutions and products for IT infrastructure to encourage excellence with the efficiency level necessary to maintain its prestige, attract, develop, and retain employees of the highest caliber and to continually improve its image in the market.

## Vision:

To encourage excellence, to inspire creativity and to be the Premier IT Solutions Company with a leadership position in terms of Market Share and Image.

## Mission:

To provide reliable and cost effective innovative IT solutions for our clients and continuously share our knowledge and expertise in Information Technology to create strong partnerships with our clients.

## Our Solutions:

EPATS offers businesses a wide range of services that result in time consuming and improved productivity locally and globally. These services include:

**Networking:** We offer network maintenance to existing networks, network installation, and network design and consultation. Our staff consists of Engineers that are fully trained to quickly serve all your

Networking needs including (Cisco, local or Remote networking, Home /office networking).

**Hardware:** We have a wide selection of products to support multitasking activities. We also offer maintenance services to computers/servers that include improving productivity to the highest available performance.

**Software:** Our software solutions are based on your needs to improve productivity and consistency with

today's and tomorrow's technology.

**System upgrades:** Based on your needs, we offer upgrade solutions to your existing systems to keep them up-to-date with the latest hardware and software technology, which will make them comparable to newer systems for a less cost. This service will include user-tutorials to properly benefit from our upgrade advantages.

**Peripherals and Accessories:** Our services cover printers, scanners, cameras, fax....etc.

**Communication Solutions:** We offer communication systems to businesses that guarantee proper communication between the employees and offices. We can also connect everything wirelessly using Wi-Fi (802.11), and Wimax (802.16).

**IT Security Solutions:** Anti Virus, Firewall Security, Internet filtering, and E-Mail Security.

**Security Solutions:** Access Control (Including Biometric devices), Radio Frequency Identification (RFID), Electronic Door Locks, and CCTV.

**AMC:** Annual Maintenance Contracts for IT Products, and Security Solutions.

**Web Based Solutions:** Design, Develop and maintain Websites and E-Services.

**Telecom:** Fiber To The Home (FTTH), PABX solutions, and Optical Fiber Solutions.

**Hospitality Solutions:** Our products bring the latest evolution in the digital lifestyle to the hotel room, putting it ahead of the entertainment curve. Our products bring hoteliers closer to their guests through the delivery of a wide range of digital entertainment and information services.

In order to meet your needs regardless of the networks in place, our products have developed the Panorama end-to-end digital platform to run over coaxial networks and will soon release

a complementary solution for Ethernet networks using IPTV.
